RICHMOND, CALIFORNIA, FRIDAY, OCTOBER 30, 1925

No. 41

World-Wide Publicity For the Golden State

Railroads Bring Trains Loaded With Home-Seekers

San Francisco, Oct. 30.—Persistent world-wide advertising by the transcontinental railroads to the Pacific coast accounts for the long trail of tourists and homeseekers who are landing in California daily. The campaign of advertising the resources and opportunities of the Pacific coast, and especially California, has just started, and 1926 will be the greatest year in the history of the state for new settlers.

The Southern Pacific Co.'s traffic representatives, 25 of them, are working out an advertising program; the main purpose of which is to summon more tourists, settlers and industries to the West.

The main object is to get them here, and after they are here see that they get employment, and also get acquainted with those who are established and prospering; that they may feel they have invaded a community not unlike the old home they left back east.

The industrial and agricultural opportunities are here, but we must acquire more of that Southern California "social welfare stuff," as one of the railroad officials termed it.

F. S. McGinnis, passenger traffic manager of the Southern Pacific railroad company, has the right ideas as to expansion. He has organized a publicity campaign that is world-wide, which will not only benefit the railroad, but will give development of the whole state an impetus beneficial to all.

Mountain View Visitors

Mr. and Mrs. W. E. Rippey were Richmond visitors yesterday. They came to look after their property interests here. They were especially interested in the inner harbor improvements. Mr. Rippey having invested in some choice lots near the coming shipping center.

Circus High Jinks Parade By Union High Students

The Union high school circus parade is billed for this afternoon when all the animals, horrors and freaky attractions that boys and girls can invent will be on display in the line of march.

The crack high band will lead the parade, and there will be enough following the band to cause the glooms to fade away in the most pessimistic individual.

Renwicks Celebrate Silver Wedding

The C. S. Renwicks, 1225 Nevins, celebrated their silver wedding Monday night, relatives coming from all points of the compass to participate in the event. Mr. and Mrs. Renwick have resided in Richmond many years.

Hallowe'en Party

Members of Richmond Moose were entertained Wednesday night by the women of Mooseheart Legion in Moose hall. Mrs. Ethel Pendleton was chairman of the committee. The mystery package was won by Mrs. W. W. Scott.

Knight Templar at Berkeley

Dr. W. F. Fraser headed the delegation that attended the ceremonial of the Knights Templar at Berkeley Wednesday night.

School Bonds Up to County Board

The matter of advertising for bids for the sale of bonds which were voted to erect a new high school here is expected to come before the board of supervisors next Monday. The \$885,000 to be raised will be used to erect a new high school and to purchase the Roosevelt Junior High school from the elementary school board, thus giving that board funds to make additions to and carry on the work of elementary schools of Richmond. Architect Lewis S. Stone of Oakland is working on the plans for the new \$500,000 high school at the present time, and Architect James T. Nabett of Richmond is preparing preliminary plans for additions to Fairmont and Peres schools.

Southern Pacific to Feature Apples

The Southern Pacific is to feature an "apple week" in the company's dining cars, to begin Oct. 31 and extend to Nov. 6. Apples will be served in every conceivable style to tempt the travelers. More than 40,000 apple menus have been printed to be distributed on diners between Portland and New Orleans.

Odd Fellows Hold First Meeting in New Building

Relapse Odd Fellows lodge held its first regular session in their new building Monday night. The building was dedicated Saturday.

Richmond Odd Fellows have erected a building that has received many compliments from visitors to Richmond. The hall is one of the most attractive and convenient for lodge accommodations in the eastbay district. Many bay city lodges will visit Richmond lodge and put on the work of the order in the new hall.

Red Men Drill Team To Enter Contest

Onetah Tribe, Improved Order of Red Men, will soon stage a drive for new members. The drill team is preparing for the night of Nov. 6th when a class of adoption will be held. Thanksgiving whist will be played night of Nov. 23. R. H. Cunningham is chairman of committee.

No Indian Summer

Chicago, October 30.—The middle west and east are shivering with cold. Winter in all its severity is here and doing business at the old stand. In parts of the Dakotas the mercury registered 14 below. The country is blanketed with snow, and Christmas weather is with us instead of the mild Indian summer.

Imp. Club Holds Anniversary

The tenth anniversary of South Richmond Improvement club was celebrated Tuesday night at a Hallowe'en party given in the clubhouse. A large anniversary cake was cut by the president, Mrs. C. A. Holland, and a buffet supper was served.

New Law Firm

Attorneys Hall Sanders and W. T. Kearney are now law partners and have secured rooms in the Pilow building at 7th and Macdonald. Both gentlemen are well known in Richmond, having been identified with the affairs of the city for a number of years.

THE BUSINESS OUTLOOK

A Review of California Conditions from WELLS FARGO BANK & UNION TRUST CO., SAN FRANCISCO

CALIFORNIA—The agricultural season now drawing to a close has been on the whole one of the most satisfactory in several years. During September weather and climatic conditions were about normal in most sections of the state. Light to moderate showers fell on the 17th and 18th of the month, being heaviest in the Sacramento Valley and central coast counties. Low temperatures and moisture held back the development of rice and cotton and retarded the drying of fruit. Rain early in October injured drying raisins, especially Muscats, few of which were stacked. In southern California the rain was beneficial, especially to citrus crops. Harvesting of grapes, prunes, apples, rice, alfalfa, cotton and other crops continued in September and the first half of October. Cotton picking and ginning are proceeding actively in southern California and the San Joaquin Valley. Vegetables are plentiful in markets and early truck has done well in the Imperial Valley. Livestock continues in excellent condition and the grass is well started on ranges in the North. In most of the rest of California dry feed is sufficient for all needs.

SALES OF AUTOMOBILES

Sales of passenger cars and motor trucks in California during the month of September were 14% greater than the same month last year. Passenger car sales increased 13% and commercial car sales 19%.

OIL

Production of crude oil in California declined 17,000 barrels per day from a daily average of 669,500 barrels to 652,500 barrels during the five weeks ended September 15 to October 13, according to estimates of American Petroleum Institute. On September 21 leading companies announced a reduction of from 10 to 25 cents a barrel in the price of crude oil in southern California and 35 cents a barrel on low gravity crude oils in the San Joaquin Valley. Some of the larger producers are reducing output by shutting down or restricting flow of wells.

TIRES

Wholesalers of automobile tires report September orders running ahead of last year, despite extremely heavy purchases in July when price advances were announced.

BUILDING

Fifty-seven leading cities in California record building permits issued in September to the amount of \$31,744,078, compared with \$33,801,926 in August and \$34,189,252 in September, 1924. For the first nine months of this year the same cities issued \$309,349,461 in building permits, compared with \$299,339,307 in the same period of 1924 and \$327,512,120 in the first nine months of 1923.

RICE

Although cool weather has retarded maturity of California rice, conditions have allowed good filling of the grain. The forecast on October 1 was 6,026,000 bushels, compared with a production in 1924 of 4,497,000 bushels.

BEANS

Reports on October 1 indicate that only 89,000 acres of Lima beans will be harvested, as compared with July 1 estimate of 91,000, and a production of 874,000 sacks is estimated, compared with 670,000 sacks from 65,000 acres in 1924 and 1,070,000 sacks from 100,000 acres in 1923. Forecast of production of other field beans is approximately 1,061,000 sacks.

COTTON

Condition of the California cotton crop October 1 indicated a production of 114,000 bales, compared with estimate September 1 of 112,000 bales, and a production of 77,946 bales in 1924. A yield of approximately 321 pounds per acre is indicated for this year. The final outcome of the crop is dependent largely upon climatic conditions during October and November. An early frost followed by considerable moisture in central California may curtail production, while comparatively warm, dry weather would make for good yields. Lower California (Mexico) will produce approximately 75,000 bales.

GRAPES

Production of all grapes in California is estimated at 2,013,000 tons, compared with 1,550,000 tons last year and 2,030,000 tons in 1923. Of this amount, the 1925 forecast of raisin grapes is 1,207,000 tons, compared with 900,000 tons in 1924 and 1,200,000 tons in 1923. It is estimated that 241,000 tons of raisin grapes had been shipped fresh up to October 5, which is equivalent to 60,000 tons of cured raisins if dried. Since the amount of raisin grapes that will be shipped in fresh cannot be determined it is yet impossible to forecast the cured raisin crop.

SAN FRANCISCO—San Francisco department stores report a continuance of satisfactory trade in the first part of October, with sales running higher than last year. Stores are still purchasing for immediate requirements only. Bradstreet's report an improvement in the retail ready-to-wear trade, particularly in men's clothing.

TOURIST TRADE

Jobbers are enjoying better business than last year and collections in most lines are improving. Leading hotels report tourist trade running slightly ahead of last year in September and the first part of October, with excellent bookings for this winter. The year 1925 has so far been a very good one for the local hotel business.

BUILDING

San Francisco issued \$3,153,083 in building permits during September, compared with \$3,840,076 in August and \$5,071,784 for September, 1924. In the first nine months of the present year, San Francisco building permits totaled \$39,313,786, compared with \$39,838,900 in the same period of 1924, and \$34,083,996 in the first three-quarters of 1923.

In the San Francisco Bay area, 11 municipalities issued \$9,849,187 in permits during September, which was slightly less than last September, but showing gains of 48% and 66% respectively over the same month in 1923 and 1922. During the first nine months of 1925, 13 municipalities in the Bay area issued \$90,692,046 in building permits, a gain of 11% over the same period last year and 30% over the first nine months of 1923.

Richmond Taxes

According to figures submitted by City Tax Collector J. O. Ford, the total amount of taxes to be collected this year will be \$602,850. Of this sum \$295,846 is yet to be collected.

It was in THE TERMINAL.

Good Girls

Telephone girls are constantly doing heroic acts and receiving no praise for them. For example, helping catch robbers, staying at their posts in burning buildings, and saving nothing when fire subscribers bellow at them over the telephone.

Timely Hints For Old Drivers and New Ones

Passing street cars on their left is prohibited at all times by the California Vehicle act. Always pass them on the right hand side. If they are stopped and taking on or discharging passengers, do not pass them at all unless you reduce your speed to ten miles per hour and can allow a clearance of six feet between your vehicle and the steps or running board of the street car. It is also unlawful to drive through safety zones.

Motorists should not stop their vehicles on the main traveled portion of any highway outside of a business or residential district for any purpose when it is possible to stop off the highway. If you have to stop to change a tire or make repairs to the car, you must move your car so as to leave at least 15 feet of the main traveled portion of the highway for the passage of other vehicles.

When starting out with a cold engine you should not speed it up quickly or drive too fast as the oil is cold and heavy. Allow the engine to warm up a little before starting or drive slowly for a mile or two. This bit of attention will reward you with much longer engine life.

Always lock the ignition switch on your car before leaving it. This not only makes theft of the car more difficult, but it prevents meddling from turning on the switch and running down the battery.

A common cause of missing at low engine speeds is a leak in the gasket connecting the intake pipe. To locate the leak, allow the engine to run at the missing speed and squirt gasoline around the intake pipe joints. If you can detect any difference whatsoever in the running of the engine, you will know that there is a leak in the gasket. It must then be replaced.

Alaska Had No Charms For Johnston

Tom Johnston, former fraternal organizer and insurance man, who has been sojourning in Alaska the past year, called on his friends here this week. Johnston is on his way to Arizona, where he expects to locate. He says there is too much "cold stuff" in Alaska, and he will try the warmer climate.

RAMBLING COMMENT

Henry Ford is 62 years old and has extensive plans for the future. Henry doesn't worry about how long he has lived. The important consideration with Henry is, not how long he has lived, but what is left of him.

Uncle Sam may hereafter hang out the sign: "No war loans made; please do not ask for them."

President Hindenburg expresses his thanks for the interest American business interests are taking in Germany. This bit of news may be of little interest to war veterans in the hospitals.

Typically American

Our telephone industry, owned by over half a million citizens, stands as typically American and represents the spirit of initiative and enterprise which has enabled this nation to surpass all others in its standard of living, conveniences, and even luxuries in the average home.

Pit River Power Project Expands

Looks Like Richmond Annex Permit the "Hyphen"

The annexation fever is now on, and some of the larger communities are looking upon the small fry with longing eyes. It may be that the little fellows will be gobbled up and taken under the protecting wing of the "larger birds."

Richmond is after the Annex and the City of El Cerrito. El Cerrito, like Albany and Berkeley, is "not willin'" just yet.

Maybe, after awhile, when tax rates assume the same level, and all the public improvements are acquired; for it is history that the outlying districts do not get much unless they secure it by their independent endeavors.

Richmond Annex is logically a part of Richmond, and has nothing to lose by joining Richmond. In fact, there is much to gain. The chamber of commerce is making an active campaign, and according to reports of the canvassing committee of that body, who have taken a straw vote, 54 are for annexation while 34 are against.

As it only requires 25 per cent of the voters to call an election, it looks like the annex is "doomed" to absorption.

Under the law it requires a majority vote at an election of this character.

New Business Block Started on Ave.

Work on the construction of the new building to be erected by F. A. Muller of Oakland at the southwest corner of 10th street and Macdonald avenue is expected to be started next week. The building will be the new home of the Richmond lodge of Moose.

The present building at the corner will be completely wrecked and hauled away today. The plans have been drawn and have been found satisfactory by both Muller and the building committee of the Moose.

New Cottages

The B. Scaprio Building Co. will start 25 new homes in East Richmond, the cottages to cost not less than \$3000 each.

Legion Contest

San Francisco, Oct. 28.—State Adjutant James K. Fisk has announced the three California winners in the American Legion's \$1500 national essay contest. They are: First prize, Miss Elinor Cole, Placerville; second prize, Mary Louise Cleveland, Selma; third prize, Robert McClelland, San Francisco.

Each of the California students wrote on the subject, "Why has the American Legion, an organization of veterans of the World War, dedicated itself, first of all, to uphold and defend the Constitution of the United States of America?" the topic for the entire United States.

Rambled Right Along

Did you see the classy locomotive, with engineer and fireman in the cab, hauling a Pullman coach along the highway, just like a regular train, Monday afternoon.

It was probably a tip as to what is coming—the dispensing of rails and a tielss roadway, without the trolley.

Pacific Gas & Electric Co. Add More Voltage

Announcement is made that F. A. Leach, Jr., vice-president and general manager of the Pacific Gas and Electric Company, that orders have been approved for the construction of the Pit No. 4 dam and intake, which is the next project in the company's power development program on Pit river in Shasta county. This diversion dam is to be located about one and one-half miles down stream from the Pit No. 3 power house, which was placed in operation July 18th of this year.

The company's engineering department has completed detail plans and designs for the dam and tunnel intake structure. The new dam will raise the water level in Pit river forty feet, and will have a crest length or width of 470 feet. The raising of this water level will form a reservoir of 1550 acre feet, backing the water up to the Pit No. 3 plant; thereby making another large lake in Pit river canyon.

Construction of this dam calls for an expenditure of \$1,750,000. Cost of the entire Pit No. 4 project, exclusive of railroad and transportation lines, is estimated at \$14,500,000. The work approved will be carried on through the winter months, employing a minimum of 500 men.

About ten miles of additional railroad construction costing about \$530,000 will be extended from the Pit No. 3 power house down the Pit river canyon to the Pit No. 4 power house site. The road, about four miles in length, has been completed to the dam site. This Pit No. 4 development is the fifth of a series of eight plants to be built in the Pit river section, Shasta county, at a total cost in excess of \$100,000,000. Hay creek No. 1 and No. 2, Pit No. 1, and No. 3 power houses, with an installed capacity of 235,000 horse power, have been completed and are now in operation.

O. W. Peterson, engineer of general construction, and the man who handled the construction of the Pit No. 3 job under the direction of P. M. Downing, vice-president in charge of electric construction and operation, will be in charge of the construction of the Pit No. 4 plant.

Roadhouse Closed For One Year

Martinez, Oct. 29.—Judge A. B. McKenzie issued an order to the district attorney, A. B. Tinning, to close the roadhouse known as Max's Inn near Stege, formerly the old Lafayette park. Max Sheehan opened and operated the place several months ago. He was arrested and jailed for violating the Volstead act. The place has been closed for several weeks, and will continue to be closed for one year according to Judge McKenzie's order. Clara Ellen Hansen is said to be the owner.

City Taxes Are Due

The first installment of taxes are due and will become delinquent if not paid the first Monday in December, which will be the 7th.

The Terminal newspaper and printshop at 314 6th st.

Elderly Wives Preferred

Judge T. G. Allen, who has been probate judge of Chase county for the last seven years, during which time he has issued licenses for and married hundreds of couples, has observed a peculiar fact with reference to Mexican couples who come to his court for matrimonial purposes, says the Topeka Capital. He has found that in the majority of cases Mexican bridegrooms bring to the marriage altar brides who are older in years than the grooms themselves. That trait is not noticeable in any other nationality, the judge finds, as in the big majority of cases the bridegrooms are older than the brides. Just why the Mexicans should prefer a wife older is not quite clear, at least to this matrimonial court.

Hawaiian Islands Growing

According to scientists, the Hawaiian islands are gradually pushing up out of the ocean, and within a generation may form a territory as large as Japan.

POWER FIGHT IN CONGRESS LOOMS

DIAMOND DAM ON THE COLORADO RIVER BIG PROJECT

PRIVATE PROJECT IS CAUSING OPPOSITION

Seven Western States Have Reached Fever Heat in Opposition to the Private Project, According to Evidence Before Power Commission.

Washington.—A new water power development fight, involving a potential "billion-dollar" project on the Colorado river and far transcending the Muscle Shoals row, appeared on the horizon of the new congress over the efforts of private interests to obtain a federal license to build a dam in the Grand Canyon of the Colorado.

While the federal power commission, composed of Secretary of War Davis, Secretary of Interior Work and Secretary of Agriculture Jardine, withheld decision on issuing the license, the senate irrigation committee left for the west to hold a series of public hearings in the territory directly affected. Whether or not the license is granted by the commission, a battle will develop on the floors of congress as soon as the committee completes its investigation. Opposition to the private project has reached fever heat in seven western states, according to evidence placed before the power commission at public hearings. Protests were voiced in person by Governor Nellie Ross of Wyoming, Governor George H. Deern of Utah and state representatives from California, New Mexico, Arizona and Colorado.

The application for permission to build the dam was made by James B. Girard, who "staked" a dam site at Diamond Creek, Colo. ten years ago. If granted the license, Girard would erect a dam across the Colorado river, with a minimum flow of 10,000 feet a second, use the development for manufacturing electric power and pay the government nothing but taxes.

Bitter opposition arose against Girard's proposed project because, under priority water rights approved by the government he would be entitled to virtually exclusive use of all water flowing through the Colorado river.

Other proposed dams, including the much discussed Boulder dam project, would have to be erected below Girard's project, because of these restrictions, and their usefulness in irrigating the surrounding country would depend on the amount of water released by Girard's dam. Under these circumstances it is said Girard's license, if granted, would be worth \$50,000,000 to a power corporation.

Whatever the commission's final decision, all indications point to an airing of the whole subject in congress.

UNITED STATES FIRMS IN CHINA SEE RUIN

Shanghai.—The United States government has instituted suit for the collection of corporation income taxes from American firms in China, which if prosecuted will result in bankruptcy of most of the American business in China, it is the general belief of business men. The first suit is against a dealer in American motor cars for \$30,000 gold, according to the district attorney, who says more suits are pending.

The officials stated that a few local American firms had paid income taxes owing to the belief that Congress would grant relief through the passage of a China trade act intended to place Americans on an equal basis with their British, Japanese and German competitors, but congress did not pass the law until the last session, with the result that few firms paid their taxes, and now if the government persists in putting on the screws, combined with the depression caused by the Chinese chaos, most of the American firms either will go into bankruptcy or transfer under British registry. The suit is creating a sensation, eclipsing the local war and political situation.

ENGLAND'S BOTTLE GOODS ARE PRODUCING SNAKES

London.—An extraordinary story of a snake in a bottle of stout is reported from Folkestone.

A customer bought a bottle of stout at a local store for supper. After drinking half a glass of the beverage he was starting to pour out some more of the liquid when the head of a snake appeared suddenly at the opening of the bottle.

The bottle and its contents were taken to the sanitary inspector, who extracted a grass snake measuring sixteen inches long. The reptile was curled up in side the bottle, which was properly sealed when purchased.

Ship Constitution Tablet Unveiled

Boston.—The old frigate Constitution is 128 years old. A tablet commemorative of the launching of this oldest of United States warships on October 21, 1797, was unveiled aboard the Constitution in the navy yard here.

State Senator Dies at Stockton.—John T. Lewis, California state senator from 1908 to 1913 and vice-mayor and councilman of Stockton since 1923, died suddenly at his home here. He had been in excellent spirits and apparent good health.

OBsolete U. S. PLANE BLAMED FOR DEATHS

Recent Air Tragedy Laid to Outworn Bomber, Says Expert—In 1925 No Fewer Than 165 Planes Were Completely Wrecked—153 in 1924.

Washington.—An obsolete plane—one of the ninety obsolete bombers which the army maintains for first line aerial attack in case of war—caused the death of Captain "Bob" Kinloch and two other army flyers at Cape May, N. J., it was revealed.

This statement was made by experts who know the condition of the planes. It was said to be identical in design and condition with the eighty Martin bombers now owned by the army and not a single one of which is safe.

Forty-one army flyers were killed in 1923, and 38 in 1924, as the result of defective planes, according to air service reports. Death has taken a running start for 1925, army flyers declare.

In 1925 no fewer than 165 planes were completely wrecked. In 1924 the number completely wrecked was 153.

The vast majority of these planes, department officials asserted, were built as far back as the war, though some of them had been "reconditioned."

All airplanes pass the "safety stage" after three years' service, it was pointed out. Then "fatigue" of both wood and metal, especially in the hidden parts which cannot be inspected without destroying the plane, sets in. Fatigue causes the parts to break when a sudden and unusual strain is placed on them.

Every bomber in the army is at least five years old, and some of them are seven years old.

All of these bombers were built before the invention of devices which, when placed on a multi-motored plane, overcomes "torque"—that is, the inclination of a multi-motored ship to sink one wing and spin in circles when one motor goes dead.

COAL STRIKE COST \$165,000,000 TO DATE

New York.—Aside from what inconvenience it has thus far caused the public, the strike of the anthracite mine workers which began September 1 has cost the industries directly affected—the anthracite industry itself and the anthracite carrying railroads—about \$165,000,000 according to reports from various interested sources. Of this about \$78,000,000 represents wages which railroad and coal employees might have earned.

In addition there is a loss to merchants in the hard coal region of Pennsylvania. This cannot be accurately estimated, but based on the lost earnings of anthracite and railroad employees, who make up a very large part of the region's buyers, it must be very large.

Also about 165,000 men are out of work as a direct result of the strike and the production of anthracite has ceased.

UNITED STATES WARSHIPS ARE ORDERED TO SYRIA

Washington.—Two American destroyers have been ordered from Gibraltar to Alexandria, Egypt, to remain in readiness there for use in Syrian ports should their presence become necessary for the protection of American lives and property as a result of the revolt by tribesmen in that country. Instructions were cable Vice-Admiral Roger Wells, commanding the European squadron, after a request for the ships had been received here from Paul Knabenshue, American consul in Beirut, Syria.

Shipping Interests Increase

Washington.—Privately owned American vessels in overseas trade increased from 117 to 134 from July 1 to October 1, the shipping board's bureau of research announced, while the number in coastwise traffic advanced from 671 to 683. The gain was registered despite the withdrawal of eleven general cargo carriers and twenty-three tankers from the Mexican trade because of business depression.

The government-owned fleet October 1 included 1,136 steam and motor vessels of 7,770,071 gross tons, about 30 per cent of which was in active service.

Labor Favors Dry Amendment

New York.—Leaders of organized labor in New York are prepared to join in the nationwide drive for workers to force congress to amend the Volstead act. This was announced by President John Sullivan of the Central Trades and Labor Council of New York. He said delegates from this city will join with delegates of other centers to push the fight for modification of the dry law. More than 6,000,000 workers, he said, are behind the movement.

Air Policeman for Chicago

Chicago.—A traffic cop in the sky to guard crowds from stunt flyers is planned by Morgan A. Collins, police chief. He will ask the city to furnish the police department with a small pursuit plane, equipped with repeating rifle and powerful searchlights.

Woman Gives Birth to Sextuplets.—Marbella, Spain.—Senora Anna Gallardo was the mother of sextuplets—a family of three boys and three girls arriving in one lot. The condition of the mother was extremely serious.

Golden State

News of Interest to All

Oakland issued 1,267 building permits, involving total construction costs of \$3,000,070, during September.

The new Colusa, Colusa county, Union High school building, for which \$200,000 bonds were voted, is in course of construction.

P. J. Connolly of Stockton was re-elected president of the Central California Wool Growers' association at an annual meeting held in Stockton.

The Alturas, Modoc county, box factory, under the management of J. G. Linkenbach, has been running over-time since reopening two weeks ago.

A royal welcome will greet delegates at the fifteenth annual supreme session of the Ancient Egyptian Order of Sciots in Stockton, San Joaquin county, November 5, 6 and 7.

Los Angeles county road gangs are putting the final touch to the new \$55,000 road which extends from Ventura boulevard to Seminole Hot Springs, a distance of eight miles.

W. A. Shepard of Auburn, Placer county, was appointed by Governor Richardson as state commissioner for the Nevada transcontinental highways' exposition, to be held in Reno in 1926.

The new \$600,000 Community Hotel being built by residents of Bakersfield and Kern county at Bakersfield, is being rushed to completion and will be ready for occupancy by March 1, 1926.

Calls for cotton pickers are coming to the free employment bureau of the Porterville, Tulare county, chamber of commerce, demands being from six to twelve pickers from almost every grower.

A freight rate amounting to one-half the regular charge will be accorded by the principal railways of the west to exhibitors of dairy cattle at the Pacific Slope Dairy show, Oakland, November 14-21.

Figures prepared by Deputy County Auditor G. W. Miller of Tuolumne county show that the cost of conducting the business of Tuolumne county runs very close to one-third of a million dollars yearly.

Contract has been awarded for the construction of the new \$250,000 home of the Boys' and Girls' Aid society in Altadena, Los Angeles county. The building is expected to be the equal of any of its type in the state.

Provided the proper progress is made in securing the rights-of-way for the laterals, the Yuba City, Sutter county, trustees will call for bids in December for the construction of a new sewer system for Yuba City.

G. H. Hecke, director of agriculture, announces that the fifty-eighth California Farmers and Fruit Growers' convention will be held in the assembly chamber of the state capitol building, in Sacramento, on November 5.

A total of three thousand live alfalfa beetles were captured by state insect inspectors during the inspection period closed a short time ago. This was brought out in figures released recently by the state department of agriculture.

The Golden State cannery in Cucamonga district, San Bernardino county, has closed its 1925 deciduous fruit season with the completion of a pack of 135,000 cases of canned peaches and apricots. This breaks all former records in the history of the plant.

With the completion of the new junior college only a matter of a few months away, Sacramento is prepared to take her stand as an educational center of the state, offering to the child and student every advantage possible for the securing of an education.

A rabbit club, with boys of the Alameda district, Los Angeles county, competing, has been organized with W. Ziegler, a Dairyman, as local leader. Each member has a unit of five does and a buck. The contest opened October 1 and closes March 31.

Aligning with the interests that are fighting to maintain the high quality of cotton in the San Joaquin valley, the Fresno Chamber of Commerce and the Fresno County Farm bureau fired a broadside in the campaign to educate cotton growers to demand quality ginning.

Governor Friend W. Richardson announced that he has approved the action of the state fish and game commission in selecting one hundred acres on the state hospital property at Napa, Napa county, as the site for the game farm to be established by the commission.

Formal answer to the action of the Yolo Water and Power corporation of Woodland for the purchase against the Yolo Water and Power company was filed in the superior court. The answer denied the allegations of the corporation that the company was in debt to the corporation to the amount of \$253,501.84, and attacked the legality of an attachment suit brought by the corporation.

The puncture vine is gaining quite a foothold in Imperial county. At a meeting in El Centro, the county board of supervisors authorized an appropriation for the purchase of a truck and spraying apparatus to wage war on the pest. Distillate, which kills the vine as well as the seed pods, is used.

The state department of agriculture has announced that the work of the bureau of dairy control of the department, together with phases of the work of other departments which touch upon dairy activities, will be exhibited at the Pacific Slope Dairy show in Oakland November 14 to 21.

The state department of agriculture announces that Arthur W. Palmer, in charge of cotton futures work for the bureau of agriculture economics of the United States department of agriculture, will be in Sacramento November 3 and 4 to attend the field crops conference of the fifty-eighth fruit growers' and farmers' convention. Palmer will discuss with California cotton growers and officials the question of securing box types and standard classing names for California grown cotton.

A 6-day school for citrus growers will be held at the Chaffey Junior college, San Bernardino county, during the week beginning November 30. This school has been arranged by the state college of agriculture and the county agricultural extension service, in cooperation with Dean C. J. Booth of Chaffey. This will be the most readily accessible school of the kind for growers in eastern Los Angeles, Riverside, Orange, San Diego and Imperial counties.

The federal government's co-operative temperature service for citrus growers will get under way again on November 1 at Visalia, in charge of E. H. Jones, representative of the United States weather bureau, who has been detailed to Tulare county for some years. Through careful cross-sectioning of the citrus district with temperature readings warnings are available which have heretofore served to prevent frost damage in the orchards.

Fire which destroyed the large Fabian-Fleisig hay and grain warehouse at Tracy, San Joaquin county, was prevented from spreading to other property by the Tracy fire department, which was notified of the blaze by a passing Southern Pacific train crew. Loss of the warehouse and its contents is estimated at \$65,000, only a small part of which is covered by insurance.

The largest sale ever reported for land for cotton raising in California has just been completed by the Kings County Development company. They have sold to Claggett, Gooch and Harris, well known cotton buyers and growers, with offices in Los Angeles and Bakersfield, 8,300 acres of their west side lands in Fresno county, one-half of which acreage is to be set to cotton.

Following a statement by Fred Shaffer, Woodland, secretary of the Yolo County Board of Trade, that the university farm at Davis was not receiving its just due, the Woodland end of Lions adopted a resolution objecting to the removal of the poultry division to Berkeley, and demanding greater consideration for the Davis branch of the college of agriculture.

According to H. A. Borchers of Visalia, San Joaquin valley representative of the division of chemistry, state department of agriculture, there is unusual interest being manifest this season in fertilization of the citrus orchards. He expects to witness application of a greater tonnage of both barnyard manure and commercial fertilizer than in a number of years.

Business manager Owen M. Duffy of the Napa, Napa county, state hospital has returned to his duties after a stock buying trip into Humboldt county. He purchased ten carloads of sheep—1,300 head—for the state farm near Yountville, which is the central slaughtering station for the Napa state hospital, Sonoma state farm, veterans' home and San Quentin prison.

The Yreka, Siskiyou county, Masonic bodies have called for bids for the sale of the lodge's property at Oregon and Miner streets, as well as that owned by the same organization where the present temple stands at Third and Miner streets. From the proceeds of the sale of one of the properties a modern temple will be erected on the other.

What is said to have been the largest sale of orchard heaters made in California this year was completed a short time ago, the Camilla grove, near Lindsay, Tulare county, having purchased ten thousand smokeless heaters as a protection against frost damage. The Camilla grove consists of 183 acres, formerly known as the Vaughn ranch.

Possibility that the Tulare County Farm Bureau federation may take up the question of a fig institute next season, by reason of the growing demand that something be done along this line for the benefit of the many who are engaged in that occupation, is being given serious consideration by the officials of the Visalia organization.

An invention expected to revolutionize phases of the peach canning industry was announced at Marysville, Yuba county, by William Reynolds, after receipt of notice that he had been granted patent papers. The new device is a combination pitter and cutter, calculated to increase the efficiency of workmen 100 per cent.

One of the largest dairy ranches of the San Joaquin valley is owned by K. Lauritzen of American Colony, Fresno county.

Construction is expected to start within a short time on the new \$75,000 Bank of Italy building in Oroville, Butte county.

Governor Friend W. Richardson appointed A. S. Walton of San Francisco as a member of the state board of pilot commissioners for San Francisco bay. Walton, a graduate of the Annapolis naval academy and for seventeen years a member of the navy, succeeds Captain Andrew Thompson, who resigned.

Because the old name conveyed the impression of a purely political organization, the Hayward, Alameda county, Civic League of Women Voters decided to drop the final phrase. Hereafter it will be the Hayward Civic League.

BOY SAVES SIX IN SUBMERGED AUTO

Hero Releases Trapped Persons and Disappears.

Armonk, N. Y.—A seventeen-year-old high-school boy was revealed as the hero who saved the lives of six persons—three of them children—in a sedan which was crowded off the road here and plunged into Kenisco lake. The boy is Richard Craig, seventeen, a student at White Plains high school. He was in a car driven by George De Nault, champion sprinter of the high school, and a few hundred feet behind that which went off the road. Seeing the sedan go crashing through the trees down a 20-foot embankment and plunge into 12 feet of water, Craig jumped out of the car, tore off his coat and dived in.

He opened a door of the submerged car and dragged one of the children to safety. Another dive brought up a second occupant of the car, and thus, one by one, he dragged all of them out and assisted in first-aid measures. Then he took all six in his car to White Plains hospital for treatment and disappeared.

Free Woman Shackled for Five Years in Stable

New York.—Shackled for five years by ankles, and wrists in the dingy, unlighted stall of an abandoned stable, during which time she had forgotten how to converse intelligibly, Anna Rolando, twenty-seven, was discovered and liberated by authorities of Turin, N. J., near Newark.

The girl's mother, Mrs. Maria Rolando, and her stepfather, wealthy owners of the farm near Turin, where Anna was held captive, were arrested. When investigators, led by indignant neighbors of the Rolandos, entered the stable and approached Anna's cell by lantern light, the girl crouched in a corner.

Then seizing a metal dish, she banged upon a grated hole in the stall, apparently expecting something to eat. Draping her burly wrap more closely about her, the girl blinked dazedly and voiced guttural, meaningless sounds as her discoverers led her into the sunlight.

When they indicated by gestures that she had regained her freedom, Anna shouted shrilly, ran about the barnyard like a wild thing and then flung her arms about an official, breaking down completely.

The girl, investigators said, had been obliged to sleep on a bed of straw. Her exercise was confined to pacing the short length her chains allowed, and she had not seen daylight for five years.

Girl Runs Thirty-Mile Rapids in Skin Boat

Edmonton, Alta.—A wireless message received from Fort Simpson, Northwest Territory, by the Edmonton Journal told how the fifteen-year-old daughter of Thomas Smith, Yukon prospector, was carried 30 miles down the swift currents of the Upper Laird river in a skin boat without oars. Her father had been drowned when the craft capsized in Hell's Gate rapids.

Struggling during the 30-mile ride to keep the canoe from crashing, the girl finally managed to bring it into an eddy and reached shore. She then fashioned a pair of oars with an old hand saw which was fastened in the boat, and rowed another 30 miles to Sutherland's camp.

The prospector, an elderly man, and his daughter left Old Fort Laird, in British Columbia, for the Lower Laird river, in the boat. When the craft capsized in Hell's Gate rapids, throwing father and daughter into the water, Smith shouted to his daughter to cling to the boat, while he attempted to keep afloat.

The girl had gone down twice when she grasped a rope attached to the boat. She tried to rescue her father, throwing him the only oar in the boat, but he sank and she did not see him again.

Romeo, 73, Elopes

Manitowoc, Wis.—Alvin Leicht and Mrs. Mary Messman of Two Rivers, both more than seventy-three years of age, eloped to Waukegan and were married. Leicht was a widower and his bride a widow.

Four Boy Castaways in Sea Adventure

New York.—Four members of the Junior Naval Reserve, all high school boys, have just returned to their homes here after an adventure all youths dream of but few experience. They were shipwrecked in a storm and lived for a time on a deserted island.

The hero was Harry W. Bennett, junior officer on the yacht Feu Follet, on a cruise in Maine waters. In a storm combined with a fog which prevented seeing more than 50 feet the yacht went on the rocks off a small uninhabited island and soon began to break up.

Bennett, seventeen years old, swam ashore with a rope and helped rescue his shipmates. After five days, during which they lived on provisions which had been saved just before the boat went down, they were taken aboard a fishing smack.

A Nervous Breakdown

Bakersfield, Calif.—"I had a nervous breakdown, unable to leave my bed. I was under the care of a doctor, but was not getting along as well as I thought I should, so I started taking Dr. Pierce's Favorite Prescription and it is the tonic and nerve tonic that restored me to health. I have never had a physical or a nervous breakdown since, which proves the thoroughness of Dr. Pierce's Favorite Prescription in reaching the source of the trouble and then overcoming the condition."—Mrs. Gertrude Higley, 1224 Truxton Ave.

He Had Had Enough, and Announced Fact

Albert, age three, went with his mother to a family reunion. Music and speeches occupied the morning, and then, as the program grew to a satisfactory close, an old uncle rose to pronounce the benediction. Albert looked all around inquiringly, then seeing that his mother's head was bowed, lowered his own with a sigh and an air of forced resignation.

The benediction, characterized by faltering speech and many pauses, was long drawn out. The fact, together with certain mysterious sounds issuing from the direction of the dinner table spread beneath the trees nearby and a growing restlessness coming evident in the crowd, were not lost on Albert. As the uncle reached the point of making his most touching appeal and absolute silence prevailed, Albert slid from his seat, clapping his hands loudly and shouting:

"I've had enough of that. Come on mother, dinner's ready!"—Indianapolis News.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Boys Study Leather

A junior technical day school for training boys for the boot and shoe trade has been opened in connection with the Cordwainers' Technical college in London, England. The course will be divided between general education and trade subjects.

Don't Be Disfigured. Keep Cole's Carbolic in the house. It stops pain from burn or scald quickly and heals without scars. At all good druggists, 50c and 60c, or J. W. Cole Co., 127 E. Euclid Ave., Oak Park, Ill.—Adv.

Trout Eggs

Nearly 50,000 rainbow trout eggs were recently shipped from Montana to Honolulu and successfully transferred to Hawaiian streams for hatching.—Science Service.

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

ECZEMA

Dries right up!

If you just realized how easy it is to stop itchy, burning eczema by simply building up the red-blood-cells in your blood with S. S. S., you wouldn't waste another minute trying to do it any other way.

That's the only way to relieve irritated, broken out skin of any sort. You lack rich, red blood. Impurities are in your system. The blood is so weak it can't fight back and overcome the enemy, so the impurities break out through the skin.

S. S. S. builds the blood back—builds millions of new red-blood-cells. Eczema dries right up. Boils, pimples, blackheads, ugly blotches and irritating rashes all disappear.

Clear up your skin. Get S. S. S. All druggists sell it. The larger bottle is more economical.

Curious Beliefs

Regarding Snakes

In spite of the great decrease in the number of British reptiles, many superstitions and charms regarding snakes still exist.

The most potent charm against snakes is said to be a milipede. Really, it is a piece of coraline limestone about the size of a pigeon's egg. Old-fashioned people believe that on one night in the year all the adders meet together and start hissing. Their breath forms a bubble which solidifies into the milipede. Whoever finds it is assured of good luck and immunity from snake bite.

Another superstition is that the breath of a snake on a hazel wand will produce a "hail" stone ring which is an infallible remedy for snake bite.

Many country folk believe that an ash tree will keep off snakes. A peasant couple were horrified to find that their baby shared its morning bowl of milk with an adder. They tied an ash twig round the child's neck, and the snake never came near it again. But the child pined away and died, becoming the loss of its playfellow, of which it had become very fond, says London Tit-Bits.

A Lady of Distinction

Is recognized by the delicate, fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Advertisement.

Sweet sixteen will always be charming no matter what the fashions and customs are.

Woman's Life Saver

Mother of nine convinced. One dose of Beecham's Pills are the remedy for sick headaches and constipation.

"Your pills certainly have done 'wonders' for me. I am thirty-eight years of age, been married thirteen years and am the mother of nine children.

"I was suffering from headaches and constipation for nearly fifteen years when I happened to read one of your 'ad's' in the paper. Having a headache that day I went to the drugstore and bought a box of Beecham's Pills. I took a dose. That dose was a 'life-saver' to me. Since then I have had no more headaches, and my health is good. I recommend them to whomever I meet."

Mrs. H. La Vigne, Jersey City, N. J.

BEECHAM'S PILLS are "life savers" to all suffering from constipation, biliousness, sick headaches, and other digestive ailments.

Lore for Dog-Owners

By Albert Payson Terhune

BOARD AND LODGING FOR YOUR DOG

Tie Around His Neck the Next Chicken He Kills and Leave It Hanging There for Three or Four Days.

THE air was fresh from a furious little thunderstorm which had swept Vine street. Old Man Negley climbed the steps of the Veller porch, where sundry of the street's dog-owners were waiting to get his advice on their canine pets' hot weather condition.

"Nice thunderstorm we had," commented the old man, as he sat down on the topmost step. "My three dogs told me it was coming, long before there was a cloud in the sky."

"I suppose they consulted their barometer," ventured Mrs. Pahl with elaborate sarcasm.

"Yes'm," returned Old Man Negley, simply. "That's just what they did. Anyone who has made a study of dogs can tell, hours beforehand, when a thunderstorm is coming up. Specially if one of the dogs happens to be scared of thunder."

"How?" challenged Pete Veller.

"For one thing," answered the old man, "a dog's breathing apparatus and a dog's nerves are geared different from yours and mine. There's a sort of breathlessness, just before a thunderstorm, that even us humans can notice. The dogs notice it a long time before it gets strong enough to reach us."

"They pant; and they get restless; and those of them that hate thunder stay close to their masters and want to be in the house. Anyone who's made a study of it can tell in a single glance at them."

"By the way, we were speaking, last night, about long-haired dogs shedding their coats in hot weather. You folks who own collies and chows and setters, and the like, can help them a lot by remembering to give them a good hard brushing with a good hard brush, every single day."

"That gets rid of a mass of the dead hair that otherwise would fall all over the floor and the chairs. And it stimulates the skin and helps the new coat to come in. It's a big saving, all around."

"Don't yank out the tufts of dead hair with a comb. If you do, you're liable to tear loose some of the new undercoat. Use a stiff brush; and use it hard. If there are tangles don't pull at them. Untangle them; as you'd untangle a snarl in a child's hair."

"It will take a little longer; but it'll mean all the difference in the world to your dog's next year's coat."

"Miss Cressan, you were asking me how to feed those three-month-old pointer puppies of yours. You said they turn up their noses at all the new-fangled prepared foods you've been getting for them. Some dogs do that."

"The only value of any prepared food is whole wheat, plus whatever amount of dried meat is ground up in it. Most pups like it. Some don't."

"I'll tell you a great secret about feeding puppies and grown dogs, too. I learned it forty years ago when I owned my first litter of pups."

"They were finicky eaters. I tried them on everything that anybody suggested to me. It didn't do much good. Then my wife gave me the idea. She said:

"'Jim, whatever is good for a human child is good for a dog child. I've got sense enough to know that. We feed our own children on bread and milk. Try it on the pups.'"

"Well, I tried it. Those puppies just fairly wallowed in bread and milk. They grew husky and strong, and there never was any more finicky eating."

"I feed it to puppies and I fed it to grown dogs, too. It's the one diet, so far as I ever could find out, that no dog ever gets tired of, after he's once accustomed to it and the one diet that never makes him sick and that keeps him strong and hearty."

chicken bones. But maybe I saved the dog's life, at that."

"A dog can get away with poultry bones once in a while, without their killing him. But soon or late they'll murder him."

"More dogs have been killed by eating poultry bones than by poison. The slivers cut into the stomach or throat or intestines as no other kind of bones do."

"It's a funny thing that foxes and wolves and coyotes can eat chickens or turkeys or ducks, bones and all, and not be harmed, while it's death to a dog. I think it's probably because wild animals eat the bones raw, and dogs eat them after the fowl has been cooked. The cooking makes the bones brittle and dangerous."

"Wasn't it you, Colonel Prouse, who asked me how to cure your pup of killing chickens? The best way I know of is to tie around his neck the next chicken he kills and leave it hanging there for three or four days."

"In hot weather like this the pup will have all he wants of the chicken's company by that time, and the chances are that he's going to leave chickens alone in the future."

"Speaking of feeding—dogs are like us humans in another way. More of them die from overeating than from underfeeding. A dog over a year old needs only one meal a day. One good big meal, at about the same time, every day. Best give it to him after sunset. A puppy, up to six months, ought to have three meals a day, and two meals a day after that till he's a year old."

"I've told you people the dark mysterious secret of feeding your dogs on bread and milk. Now let me tell you a still more mysterious medicine secret."

"If ever you have a dog that begins to seem out of sorts, in any way at all—whether he's off his feed or dull looking or whatever seems to all him—give him a big tablespoonful of plain castor oil. Three times out of four it will cure him. And it can't possibly hurt him. It's the grandest medicine on earth, both for dogs and for humans. (For my own part, I won't take the horrible stuff, but I've made many a dog and many a child take it, and they usually get well.)"

"Remember something else, too: If your dog doesn't improve right away after his dose of castor oil, send for the nearest first-rate veterinary you can find. It's bad economy to save a \$3 veterinary fee by giving 'home treatment' to a \$300 dog that's sick."

"A dessertspoonful of codliver oil a day is grand tonic and health builder, too, for any dog. Not an emulsion, but the plain unadorned codliver oil. Generally dogs like it. Generally they hate castor oil and you have to give it to them by force."

"Mr. Greer, you asked me what kind of bedding to put in your dog's kennel in summer. None at all. Leave the boards bare. In winter the best bedding is cedar shavings. They make his coat smell sweet and they scare off fleas. But in summer he doesn't need any bedding. On hot days don't scold him if he digs a hole in the cool loam of a flower border to lie in. It does him good and it keeps the heat from wearing him down."

International Bridges

There are ten bridges over the Rio Grande where the same forms the boundary between the United States and Mexico, to wit: At El Paso, Texas, Santa Fe street bridge, Stanton street bridge, which are used for foot and passenger vehicles, and the steel cable line between the cities of El Paso and Juarez, Chihuahua; the Mexican Central railway bridge and the Mexican Northwestern railway bridge; at Del Rio, Texas, a temporary bridge used for foot and automobile traffic; at Eagle Pass, Texas, a foot and vehicle bridge; and a railroad bridge; at Laredo, Texas, a foot and vehicle bridge; and a railroad bridge; at Brownsville, Texas, a railroad bridge, which is also used for foot and vehicles.

The Kitchen Cabinet

(© 1925, Western Newspaper Union.)

True happiness leaves no reactions. The mind is at rest with itself and the consciousness is filled with the joy of living.—David Starr Jordan.

SEASONABLE FOODS

As beef loaf is still a very popular and economical meat to serve, as there is no waste, it will probably continue to be served on our tables, at church suppers and at outings. The following is a good one to try:

Beef Loaf.—Take one pound of the round of beef and one pound of fresh pork—both well mixed after chopping—add two beaten eggs, one cupful of bread crumbs, one cupful of tomatoes strained to remove seeds, salt and pepper to taste, with a teaspoonful of finely minced parsley and a few dashes of cayenne. Roll into a loaf, place in a one-loaf bread pan and bake one hour, basting occasionally.

Rice Pudding.—Take one-fourth of a cupful of rice, wash and put into a baking dish with one-third cupful of sugar, a handful of raisins, a pinch of salt and a grating of nutmeg and a quart of milk. Bake in a slow oven, stirring at first, then brown. Serve with a hard sauce using nutmeg as flavoring. If the milk is skimmed or not rich add a tablespoonful or two of butter, for richness.

If you are fond of codfish be sure to serve:

Codfish Chowder.—Shred half a pound of soaked salt fish and parboil for a few minutes to remove the salt. Dice one-fourth of a pound of fat salt pork into half inch dice, fry until brown in the chowder kettle, add three sliced onions, six sliced potatoes and cover with boiling water. Cook until the vegetables are tender then add the codfish and one quart of scalding milk, six milk crackers and such seasoning as one's taste desires. Serve hot, a cracker to a bowl. This dish is especially good served for luncheon or supper on a chilly night.

Banana Lemon Whip.—Boil together two cupfuls of sugar, two cupfuls of water and the grated yellow rind of a lemon until it hairs. Soften one-half of a package of gelatin in cold water and add to the hot sirup. Stir until dissolved, then add the sifted pulp of four ripe bananas, mixed with the juice of two lemons. Pour all into a large bowl to cool, and when the edges begin to harden beat the mixture with a large sized Dover egg beater, continuing to beat until the whole is creamy. Pour into a mold and chill, or serve piled into sherbet glasses.

Lobster Chowder.—Remove the meat from a two-pound lobster and cut into small dice. Cream two tablespoonfuls of butter, add the liver (the green part), and two milk crackers; scald a quart of milk with a slice of onion and add milk to the lobster. Cook the body bones ten minutes in water to cover, strain and add to the chowder. Season with salt and pepper and serve at once.

Autumn Dishes

A delicious and nourishing soup to serve for luncheon, dinner or supper on a chilly day is:

Veal and Sago Soup.—Chop fine two and one-half pounds of lean veal. Cover with three quarts of water and bring slowly to the simmering point and simmer two hours, skimming occasionally; strain and reheat. Soak one-fourth of a pound of pearl sago one-half hour in cold water, stir into the hot stock and cook thirty minutes or until the sago is perfectly clear; now add two cupfuls of scalded milk and pour slowly on four egg yolks slightly beaten. Season with salt.

Salmon Supper Dish.—Heat a can of salmon, turn out on a hot platter, removing the skin and bones and tossing slightly with a fork. Around the salmon heap rice, well-seasoned mashed potatoes, and around the potatoes pour a rich white sauce, using two tablespoonfuls each of butter and flour to a cupful of rich milk; cook until thick and season well with salt and cayenne. Serve at once.

Lamb Chops With Pork.—Remove the fat from six chops cut two inches thick. Wrap round each a thin slice of fat salt pork—fresh will do—overlapping and fastening well with a wooden toothpick. Place on a greased broiler and cook until the meat is well done. Season with salt and pepper, spread with butter and let stand in the oven for three minutes. Remove to a hot platter and garnish with parsley.

Bread and Butter Pudding.—Spread slices of bread with butter and arrange them butter-side down in a buttered baking dish. Beat three eggs slightly, add one-half cupful of sugar, one-quarter of a teaspoonful of salt, and one quart of milk; strain and pour over the bread. Let stand thirty minutes. Bake one hour in a slow oven, covering the first half of the baking. Serve with hard sauce. Cream four tablespoonfuls of softened butter with a cupful of powdered sugar added gradually; add a tablespoonful of cream and enough grated nutmeg to flavor.

Neenie Maxwell

My Lady's Mare

By DOROTHY DOUGLAS

(Copyright.)

BEFORE leaving for Florida for a month or two, Lady Whitlock did something so lovely that Marie, her faithful housemaid, positively wept over it.

"Marie, you have done more for me in the time you have been with me than ten maids I have ever had. Now, I know you love horses and riding. While we are away would you like to ride Marie for her daily exercise? Simpkins will be riding the master's horse and will take good care of you."

"Oh, madame, you are too kind," cried the delighted Marie. "You know how much I have missed the horses since I left the farm."

"I do, and I know you would be back there where your heart is if you weren't so faithful to me. Now run along and tell Simpkins what I have said. And the kindly little American, Lady Whitlock, who had married into the English aristocracy, turned away quickly so that she might not see the big tears of joy that welled into Marie's eyes."

Simpkins was as delighted as Marie. It was a bit lonely riding one horse and leading the other each morning through the park.

The next day Policeman John Gillow, riding along by the bridge path, watched Simpkins and Marie riding side by side. He knew Simpkins slightly as the groom of Lord Whitlock and he supposed, of course, that Marie was no other than her ladyship herself.

He touched his cap as they went past him and it seemed to Gillow that he had never met a pair of more regular eyes than those of the little lady on the black mare. For some time now, Gillow had been feeling the loneliness of a policeman's life.

To Marie, the ride on so splendid a mount and with Simpkins beside her, was one of sheer delight.

They cantered through the park for two hours and, on the return, again passed Policeman Gillow and again the regular eyes looked swiftly into those of the officer.

Policeman Gillow was an extraordinarily good-looking man, nor was it the uniform that did it. His mount was a beautiful chestnut mare.

Marie longed to question Simpkins regarding him but felt it would not be tactful. Also she had a feeling that if Simpkins knew she was interested in anyone he would guide the mares over toward Riverdale drive and thus deprive an officer of the law from gazing upon Marie.

So the rides through the park went on daily and each day Marie and Gillow exchanged but the slightest of glances. And there was that in the look of her eyes that told Policeman Gillow the very oft-told tale. He sighed heavily, for the eyes of a policeman could only come to grief by looking too closely into the eyes of Lady Whitlock.

My lady's mare was certainly a thoroughbred and whether or not her instinct told her about conditions of the heart or whether it was just fate, no one will ever know. Her brown eyes, however, had been appraising the mount upon which Gillow sat so nobly and perhaps she wondered who might win in a short race.

The black mare chose a morning when it was gloriously sunny and when Simpkins' mount seemed a bit weary.

Anyway, just within sight of the good-looking officer on his good-looking mount, my lady's mare decided to bolt and see who would catch her up.

It was a pretty stiff and fairly fearsome race that followed.

The chestnut mare got her dander up when she saw the mud flying behind the black and after her she flew like the wind, urged by her master to a speed she had not known herself capable of.

Simpkins gasped, saw that he was quite out of the running and, feeling reasonably certain that Marie would keep her head, followed in the wake of the two mud-flying mares.

Gillow urged by a speed that was of the heart, was soon alongside the black mare and had her bridle firmly gripped.

Marie, of course, did the usual thing of keeping her head so well and promptly fainted. Gillow caught her swiftly and firmly—perhaps more firmly than he had caught the bridle.

The mares, now that they had done their duty, seemed happy and compared notes on various speeds possible in the park.

"My lady," said Gillow, touching his cap, "you had a right that time—you were very brave." He was looking very deep into those regular eyes, now that they were open.

"I'm not 'my lady,'" she said sweetly. "I'm my lady's maid."

"You won't be that for long," thought Gillow, and the two mares seemed happy at what they had brought about.

Oratorical Daddy

Corax may be given the title "Father of Oratory." Greeks settled in Sicily found titles to their property in Syracuse unsettled, owing to wholesale confiscations. Upon returning to their country they found it necessary to appear in person to appeal to the courts. Corax drew up a few simple rules for orderly presentation of such claims and fixed the form of addressing the courts.

Children Cry for

Fletcher's CASTORIA

MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Dr. H. H. Fletcher*. Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

Artificial Silk Expansion

One plant manufacturing rayon, or artificial silk, in the Netherlands, employs 5,000 people and plans to enlarge the output to include the making of artificial horse hair, artificial straw and other cellulose products.

Fight on Luxury

An anti-luxury society has been formed in Tokyo by students. It hopes to induce the wealthy people of Japan to discontinue habits of luxury.

Shuts Off "Snoopers"

A device to prevent eavesdropping on telephone call-boxes is being tried at Fleetwood, England, post office. A "buzzer" has been installed which comes into operation as soon as the caller closes the door. It cannot be heard inside the box, but prevents those outside from overhearing the conversation.

Money is the root of the manufacturing plant.

SAY "BAYER ASPIRIN" and INSIST!

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

DOES NOT AFFECT THE HEART

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monocrotonic Acid of Salicylic Acid.

Whistling Saved Ship

How a man standing on the Hartlepool (England) breakwater guided a fishing vessel into harbor, during a dense fog by whistling was told at a meeting of the port and harbor commissioners. So dense was the fog that the captain could not see where he was. Then he heard some one whistling, and called out, "Where are you?" Ascertaining that the voice came from the breakwater, he told the man to keep on whistling while he got his bearings. The man did so, and the vessel steamed safely into harbor.

New Motor Fuel

A new motor alcohol made from molasses and the juice of the sugar palm is said to make starting easy and eliminate knocking and carbon troubles. Its disadvantage is the cost of manufacture, but extensive experiments are being made in Hawaii to overcome this.—Exchange.

Valuable Watercress

Tradition and investigation have given to watercress a very high place among medical men for its real food value.

The miser hoards himself poor. Discontent is want of self-reliance.

Her Rheumatism Vanished!

After two years of agony, this woman thanks Tanlac for restoring lost health

For two years, "Mary Arpentigny, had rheumatism in her right arm and hand so bad she couldn't lift a comb to her hair. Indigestion made matters worse.

Finally her brother urged her to try Tanlac and improvement came with the first bottle. "Now," writes Mrs. Arpentigny, "my appetite is fine, my indigestion is gone and every sign of rheumatism has left me. I only hope others will profit by my experience."

*Authentic statement; address on request.

More people have been helped back to health by Tanlac than by any other tonic. Physicians testify to that. Our files are crammed with letters of grateful thanks from every part of the world. Isn't this evidence enough for you?

Don't get feeling worse and worse each day. Head off that sick spell. Start the Tanlac treatment today. Ask for a bottle of Tanlac at your druggist's. Take it according to directions and see how much better you feel. We know what it can do for you because we know how it has brought health to thousands like you. It's folly not to make the test.

NOTE: For Constipation, take Tanlac Vegetable Pills, Nature's own harmless laxative.

TANLAC

FOR YOUR HEALTH

Can't Fool Him This Year

Four huge halibut, weighing altogether something like 1,148 pounds, or an average of 280 pounds each, were landed at the Aberdeen fish market by the local trawler Ben Mellen. This vessel had been away on a trip to the Faroe fishing grounds, where she secured besides a fair haul of other classes of fish, a good number of big flats. The four giant halibut on being exposed for sale met with keen bidding, and were knocked down at £31 (\$155) for the four.—Family Herald.

First in Electricity

Herbert Hoover, secretary of commerce, puts America first among all nations in the development of electrical progress. He backs up his statement by citing America's 15,000,000 telephones, 27,000 telegraph offices, 9,000,000 homes wired for electricity and 27,000,000 horse power in electrical energy capacity.

Ontario's Gold Production

Gold production in Ontario in 1924 increased about \$250,000 a month over the previous year's output.

Boat Travels Fast

What is believed to be one of the fastest boats ever built has been constructed by H. N. Sherburne of Plaquemine, La. It is a craft driven by a 50-horsepower airplane motor mounted on the stern. With a full load the boat will attain a speed of more than 60 miles an hour.

By No Means All Right

"I say," exclaimed Mr. Brown in a worried tone, "I'm sorry my dog bit you last week!"
"Oh, that doesn't matter a bit," said his friend. "That's all right!"
"No, it isn't!" declared Mr. Brown. "The poor thing has been ill ever since!"

Pacific Live Stock Show Will Open at Portland Oct. 31

Portland, Oct. 30.—Breaking all records for number of livestock entries the fifteenth annual Pacific International Livestock exposition will open in this city tomorrow, when the best of America's blooded animals will be exhibited to the public in both stall and contest for \$100,000 worth of cash premiums. Every breed of all kinds of live stock will be on exhibition. Already many blue ribbon winners at eastern fairs and exhibitions have arrived at the Portland show. Notable livestock judges of England and America will make the awards on the various classes of animals to be judged. A livestock parade and horse show will be held every evening during the exposition which will continue until November 7.

Prominent at the show will be the livestock breeders of the Pacific coast who annually congregate at the Portland exposition to consider the interests of the livestock world.

Albany Couple to Cross Atlantic

(Albany Argus)

Henry O. Henriksen, plumber at Marin and Talbot, accompanied by his good wife, will sail for Denmark in another week, where they go to attend the golden wedding of Henriksen's father and mother. There will be a family reunion on this occasion, there being eleven children, all grownups, and many grand children who will participate in the happy gathering at the old home in far away Denmark.

Santa Fe Excursion

One thousand persons are expected to attend the all-day bay excursion on Sunday, November 8, for Santa Fe employees and their families. The trip will be made on one of the company's steamers. There will be good entertainment, dancing, vocal and instrumental numbers, stunts and other features. William Patterson is chairman of the committee on arrangements.

Many residents of that part of Europe regret that Balkan peasant women are permitting their daughters to forget the art of embroidery. At one time every Balkan girl used to embroider, with the result that one saw really magnificent costumes in the villages. Like the old Scottish clans, each district had its particular type of embroidery. The Macedonian blouses and sleeves were especially striking. In Rumania some society women have set on foot an organization to encourage embroidery among the peasants. Unfortunately the latter seem to prefer cheaper and more gaudy manufactured clothes and silks that are not a tenth part as decorative as are their home-made productions. When Paris dressmakers set the fashion of embroidering evening dresses buyers visited the Balkans in search of designs and materials but the supply proved unequal to the demand.

HARDLY

"Well, my wife has divorced me."
"And I remember the time when she used to wave her hand to you, every morning, when you left the house."
"Well, you see, it wasn't a 'permanent wave.'"

Father's Local Influence

The election of Robert La Follette, Jr., to the United States senate illustrates to the country at large that our primary system is a disease and not a symptom. While young La Follette received a majority of the votes cast, he is a minority choice. There were 600,000 registered voters who did not vote; 300,000 did, and these were divided among four factions. As usual, his following was "on the job" and predominated in this face of "popular election."

Another radical thus obtains the great honor of becoming a United States senator and given opportunity under official power to continue agitating the policies, which for thirty years, under his father's influence, resulted in socialistic legislation and kept the country in an uproar of confusion. The United States has to pay not only the money cost, but the prestige of the senate is impaired and the great majority sentiment of the nation, as demonstrated in the last presidential election treated with contempt.

Admirers of La Follette, Jr., point with pride to the fact that, with the exception of Henry Clay, he is the youngest senator ever elected to that exalted position. If his future career equals that of Henry Clay in the scope of high accomplishments, "the crime of being a young man" will not be urged against him, but the commitments he has made and upon which he was elected, tormented him from any compromise with Kentucky's pre-eminent statesman. —Letter America Federation.

THE TERMINAL is on file in all the public libraries in Contra Costa county and has hundreds of readers.

Says Coffee Planters Are Hoarding Profits

Responsibility for the dearth of paper money that has been embarrassing Brazil is laid at the door of the coffee planters of Sao Paulo by the newspapers of Rio Janeiro, some charging that the planters are making so much money through the high prices for their product that they are afraid to bank it and are hoarding it. While it is probable that this attack is inspired by politics, there are interesting points that may throw light on the high prices for coffee. O Jornal of Rio Janeiro which has semigovernmental inspirations at times, charges that the production of a sack of coffee does not cost the planters more than \$6 gold, while they are receiving for it \$18. Multiplying this alleged profit on one sack by 9,000,000—the number of sacks in an average crop—shows the profits of the industry, according to O Jornal. The new Brazil income-tax law may have something to do also with the hoarding of money by wealthy planters. The number of Brazilians who have filed income-tax schedules is surprisingly low.

THE LEISURE CLASS

"Does he belong to the leisure class?"
"Why, man, he never used an alarm clock in his life!"

The Terminal can print it for you. Phone Richmond 132.

Mark Hulings Returns From Visit to Old Home in Iowa

Mark Hulings, who has been in the employ of the Western States Gas Co. for a number of years, has returned from a visit to his old home town, Mt. Pleasant, Iowa, and reports many changes in old Henry county, of which Mt. Pleasant is the county seat.

Hulings says the old farm where he spent the happy boyhood days, is still there and the old Skunk river swimming hole and wooden bridge have changed locations owing to numerous freshets in the past 35 years, since Mark's residence there.

He says bumper crops have put the farmers on easy street, and that automobiles are thicker than flies around the public square.

William Hemme

Danville, Oct. 28.—Following a stroke of apoplexy several days ago William Hemme, justice of the peace of Danville for 12 years, died today at the age of 72 years. Hemme was for eight years prior to being justice of the peace a supervisor from the Danville district.

The Terminal is now in new quarters at 314 6th street.

CERTIFICATE OF INDIVIDUAL DOING BUSINESS UNDER FICTITIOUS NAME.

State of California, County of Contra Costa, ss.
I, the undersigned, hereby certify that I am transacting business at the City of Richmond, County of Contra Costa, State of California, under a fictitious name, or a designation not showing the names of the persons interested as partners in such business; that the aforesaid fictitious name is the Richmond Electrical Co.; that the name in full and place of residence of the owner of said business, and of all members having any interest whatsoever in said concern so transacting business as aforesaid, is as follows:
R. V. Archambault, Richmond, California.

In witness whereof I have hereunto subscribed my name this 7th day of October, 1925.

R. V. ARCHAMBAULT,
State of California, County of Contra Costa, ss.
On this 7th day of October, 1925, before me, Clare D. Horner, a notary public in and for said county, personally appeared R. V. Archambault, known to me to be the person described and whose name is subscribed to the foregoing instrument, and he acknowledged to me that he executed the same.

In witness whereof, I have hereunto set my hand and affixed my official seal this day and year in this certificate first above written.

CLARE D. HORNER,
Notary Public in and for the County of Contra Costa, State of California.

NOTICE OF ADMINISTRATOR'S SALE OF REAL ESTATE AT PRIVATE SALE

In the Superior Court of the State of California, in and for the County of Alameda.

In the matter of the estate of Adèle LeFebvre Gamache, a woman known as Adèle LeFebvre Gamache, also known as No. 37224 Adèle LeFebvre Gamache and also known as Adèle Jean Gamache, Deceased.

Notice is hereby given that the undersigned administrator will sell at private sale to the highest bidder for cash, lawful money of the United States, and subject to confirmation of the Superior Court above entitled, on or after the 7th day of November, 1925, the following described parcels of real property situated in the County of Contra Costa, State of California:

First: All of lots numbered 64 and 65 in block lettered G, as said lots and block are respectively laid down and delineated upon that certain map entitled, "Map of Harbor Gate Subdivision in the City of Richmond, Contra Costa County, California, E. P. Cykier, Engineer, October 28, 1913," and filed in the office of the County Recorder of Contra Costa County, California, October 31, 1912.

Second: All of lots 22 and 23 in block 10, and all of lots 3 and 9 in block 3, as said lots and blocks are delineated and so designated upon that certain map entitled, "Map of Corritos Addition to the City of Richmond," filed for record in the office of the County Recorder of Contra Costa County, California, on November 19, 1906, and recorded as amended in said office on June 15, 1910. Being a portion of lot 26 of the final partition of the San Pablo Rancho.

Third: Lots Nos. 25 and 26 in block No. 1 in Huber's Addition to Richmond, being all of lots twenty-five (25) and twenty-six (26) in block No. one (1) as said lots and block are laid down and delineated upon that certain map entitled, "Huber's Addition to Richmond," being a subdivision of a portion of lot No. 60 of the San Pablo Rancho, Contra Costa County, California, which said map was filed for record in the office of the Recorder of Contra Costa County, California, on the 8th day of May, 1907.

Fourth: All of lot numbered twenty-three (23) in block numbered forty-seven (47) as said lot and block are laid down, delineated and so designated upon that certain map entitled, "Map of North Berkeley Terrace, October 1908," filed November 2, 1908, in the office of the County Recorder of said County of Contra Costa.

Parcels First and Second are situated in the City of Richmond.

Terms and conditions of sale: Cash in lawful money of the United States, ten per cent of the purchase price to be paid at the time and place of sale and the balance upon confirmation of sale by said Superior Court.

All bids or offers must be in writing and may be left at the office of Breed and Burpee, Room 814 First National Building, Broadway and San Pablo Avenue, Oakland, California, or delivered to the administrator personally, or may be filed in the office of the Clerk of said Superior Court at any time after the first publication of this notice and before the making of the sale.

Dated October 14, 1925.
GEORGE A. GAMACHE,
Administrator of the Estate of said Adèle LeFebvre Gamache, deceased.
BREED AND BURPEE,
Attorneys for Administrator,
Oakland, California.

How to Buy a Diamond

THERE are two methods by which you can be certain of obtaining perfect diamonds. You can familiarize yourself with all the phases of the diamond industry, a lifetime task...

Or you can go to that jeweler whose name and reputation guarantee the quality of his diamonds, and who represents them exactly as they are.

Obviously this is the simplest method for the layman—and Edwards has been selling diamonds to satisfied customers for almost a century.
